Jorge Salas is a Caribbean artist, whose work is part of Naïve Art. In his paintings, he takes as a reference its people, its landscapes, the color of its culture, especially children. The artist portrays the human and the everyday, finding in the gaze of a humble child or the contagious smile of a teenage girl. He masterfully captures the happy innocence in the faces of children, projecting childhood feelings into his works to always remember. His technique is acrylic on canvas, in which he uses a lot of material and impasto highlighting each of the details.
